Leotard Sizing Chart

How to measure:

- A leotard should be worn when taking measurements, not street clothes.
- It is very important that you take chest, waist, hip and girth measurements.
- Do not use last year's leotards as a size reference, they do not reflect the correct size your athlete will need this year.
- If you want the leotard to have a sleek fit with minimal wrinkles, you will want to order the closest size that corresponds to your athlete's measurements on our size chart.

- A) GIRTH: Measure from the center of one shoulder, down the front through crotch and up the back to starting point.
- B) CHEST: With arms relaxed down at sides, measure around the fullest part of chest, keeping tape measure parallel to the floor.
- C) WAIST: Measure around natural waistline, the narrowest part of the upper body (not over shirt or pants).
- D) HIPS: Measure around fullest part of the lower body, keeping tape straight and parallel to the floor.
- E) INSEAM: Measure inside of leg, from the crotch to 2 inches below the ankle bone.

GIRLS'/WOMEN'S SIZE CHART For Leotards, Custom Warm-Ups, and all Accessories
